

TECH4NONDEV TECHNOLOGY ESSENTIALS FOR NON-DEVELOPERS

• Speak Tech • Think Tech • Work Smart.

Audience

Individuals looking to transition into Non-Technical Roles in the Tech Industry.

Course Overview

The Tech4NonDev Cohort Program is a 6-month intensive training course which equips participants with essential project management, business analysis, product management, quality assurance, and agile methodologies to excel in the tech ecosystem.

Course Overview

- First 3 Months (Training Phase): Participants undergo in-depth training in five professional courses, gaining knowledge and hands-on experience in:
 - Project Management Professional (PMP)
 - Scrum Master
 - Business Analysis
 - Product Management
 - Quality Assurance
- Next 3 Months (Internship Phase): Participants work on a live project, collaborating in teams to apply the concepts learned. This hands-on experience prepares them for real-world job roles, ensuring they are industry ready.

Training Details.

Duration: 6 Months

Training Fee: N450,000

TESTIMONIALS

With over 500 participants, our Tech4nondev program has established itself as a leader in Tech without coding education and helped many to move into many fields in Tech like Health, Education, Banking, Insurance, Hospitality etc.

TECH4NON DEV TESTIMONIALS Cohort 1.1

Joining the Tech4Non-Dev cohort training/internship was the best decision I ever made. The coaches delivered valuable content. The training afforded me to improve on my presentation and helped me work better as a team member. The confidence and knowledge I've gained are setting me up for a more challenging but successful career as an Agile Scrum Master

Name - Atunwa ; **Location** - Lagos, Nigeria ; **Position** - Scrum Manager.

This experience has been transformative, equipping me with a solid understanding of product development principles and practices. I've gained valuable insights into product backlog management, feature development, go-to-market strategies, and more. Thanks to the guidance and support of the Zep Technology and AVA teams, I'm now confident in my ability to navigate the tech industry as a product manager. This internship has been a game-changer in my career journey, and I'm grateful for the experience and knowledge gained.

TECH4NON DEV TESTIMONIALS Cohort 1.1

Where do I even begin? The impact of this cohort program on my life and relations going forward will be and already is profound. I was amazed at how little I knew of the subjects being taught but I knew I was excited to learn and absorb the teachings. The patience, attention to detail and delegation were particularly standouts for me. This made me a better man but more importantly a better person. I'd recommend the experience to those looking for growth and a sense of family. It exists here and more.
