

DIGITAL SKILLS FOR GAP YEAR PROGRAM BROCHURE – (TECH SUMMER SCHOOL CANADA)

Target Audience

- High school students on summer break
- Teenagers interested in Technology and digital skills
- Youths looking to explore tech career path early
- Parents seeking productive, skill-based program for their children.

Course Objectives

To provide high school students with a fun, hands-on introduction to digital skills, creative problem-solving, and modern workplace readiness during the summer break. This program empowers teens to build confidence in tech—without needing prior experience or coding knowledge—and prepares them for future academic and career opportunities in a tech-driven world.

Course Overview

- Acquire digital tools needed in today's world
- Learn how to freelance or monetize your skills through social media
- acquire design skills to create fliers, ebooks, cartoons that can be monetized on amazon
- Ai automation and digital tools mastery
- acquire excellent presentation skills that adds to your confidence.
- earn a certificate for completion
- Gain confidence with communication and conflict resolution
- Critical thinking and creativity
- Get skills that prepare you for the university.

Course Outlines

- Data Entry, Record Keeping, Financial Literacy & Invoicing
- Presentation & Visual Communication
- Conferencing & Online Communication
- Artificial Intelligence Tools
- Project Collaboration
- Note-Taking & Productivity
- Email & Professional Writing
- Cloud & Document Storage
